

Our aim is to transform public health in North East London, North Central London and Essex from an area of social disadvantage and poor health outcomes to one of excellence.

We have appointed 3 HIEC fellows that will at the end of 12 months return to the system as effective change agents.

We have a web presence and are developing an online web community

In 2010/2011 we intend to extend our program of work to the areas of Eyes and Vision, Asthma in children and young people and Migrant Health

ACUTE Maternity	LONG TERM CONDITIONS COPD	PREVENTION Cardiovascular Disease
<ul style="list-style-type: none"> • Project commenced in partnership with NHS Institute for Innovation & Improvement: 6 hub hospitals (Mid Essex Hospital, BLT, Whipps Cross, Southend Hospital, Whittington, Homerton Hospital).
