

## **Migrant Health:** Infectious diseases: Identification and management

Free evening seminar, Wednesday 1 February 2012,  
Light supper provided  
(Late comers welcome)

**Come and join us for our third event with tips from experts on identifying and managing some infections relating to travel and migration.**

**Some interesting topics for the evening:**

- Imported parasitic infections and their relevance in primary care.
- Risks to the travelling migrant - malaria, typhoid etc.
- Catch up on vaccines.
- Sustaining a primary care network.
- Others

*Evening will offer an opportunity for an educative session with a panel of experts on various infectious diseases, usually related to migration and other less commonly seen infectious diseases within the UK. We would welcome:*

**GPs, Practice nurses, primary care workers dealing with patient health and migrant health issues related to infections.**
